- Developed and maintained web applications using React.js and Node.js.
- Created interactive dashboards and visualizations using React.js.
- Developed and deployed RESTful APIs with Node.js and Express.js.
- Managed application state using Redux for better state management and performance.

## **Alakmalak Technology**, **Ahmedabad**

Laravel Developer, June 2020 - December 2020

- Developed and maintained web applications using the Laravel PHP framework.
- Created custom Laravel packages to extend application functionality.
- Implemented complex business logic and features in Laravel-based applications.
- Collaborated with cross-functional teams to deliver high-quality software solutions on time.

## **Cosmonaut Technologies**, **Ahmedabad**

Laravel Developer, April 2019 - May 2020

- Developed and maintained web applications using the Laravel PHP framework.
- Managed database operations using MySQL and optimized queries for performance.
- Developed RESTful APIs for mobile and web clients.
- Integrated payment gateways and third-party services into Laravel applications.

# My Live Projects

## Wallmetrics

Role - Frontend and Backend Developer

Language- React Js, Node js

Database- Postgres

**Project Description:** This project is based on third-party services to get data from Walmart and store it in a PostgreSQL database. For this project, Node.js was used for the backend and React.js for the frontend. My responsibility was to create APIs and integrate these APIs into the frontend.

## kliimamarket

Role - Frontend and Backend Developer

Language- React Js, Node js

Database- MySQL

**Project Description:** This project is based on E-commerce and uses MySQL as the database. For this project, Node.js was used for the backend and React.js for the frontend. My responsibility was to integrate APIs into the frontend and develop the UI.

## Bamerc

Role - Frontend

Language- React Js

Database- MySQL

**Project Description:** This project is based on School Events and upcoming camps. For this project, React.js was used for the frontend. My responsibility was to integrate APIs into the frontend and develop the UI.

## Dropthis

Role: Web Developer

Technologies: Laravel Framework (PHP), jQuery

Database: MySQL

**Project Description:** Developing a web-based application where artists can add their labels and get reviews from senior artists. For this project, PHP, jQuery, and MySQL were used. My responsibility was to develop the frontend and integrate it with the backend APIs.

## Bassinger's Pharmacy

Role: Web Developer

Technologies: Laravel Framework (PHP), jQuery

Database: MySQL

**Project Description:** Developing a web based application. This Project is based on the Pharmacy System. For this project we used Laravel.

## Trade Safe

Role: Web Developer

Technologies: Wordpress (PHP), jQuery

Database: MySQL

**Project Description:** It shows the Law, Trade Market, Patent, Copyright Act, Design Act, Cyber Law, Corporate Law & Geographical Indication. For this project we used Wordpress MVC framework And for validation we used jquery.
