PROJECTS

RMG (Resource Management System) (06/2024 - Present)
- Developed and optimised features for the RMG (Resource Management System).Handled bug fixing and developed new requirements for enhancing a smooth work flow of the system using Laravel and MsSQL.

HRM (Human Resources Management) (06/2024 - Present)
- HRM Portal for management of Human Resources and recruitment services of the company.Developed new features and implemented feature to make management faster and efficient for individuals in the company

Training and Placement Portal (03/2022 - 03/2023)
- This was my B. E major project which was done by group of 4 people. My role was in frontend development for designing the webpages and to maintain functionality between the pages. This project was for our college level where we created a portal to make placement process digital. Students could give exam on the portal and get notified for placements arriving in campus.

Loan Eligiblity Prediction (08/2022 - 10/2022)
- This was a Machine Learning project.Analyzing the given dataset on the basis of marital status,income,number of dependents in family,total bread earners and amount of loan the machine analyzes whether one is eligible for a loan or not.
