rajul-tiwari rajul-tiwari Sagar, Madhya Pradesh

PROFESSIONAL SUMMARY

Passionate Frontend Developer with expertise in React, Next.js, Tailwind CSS, Firebase, Framer Motion, Redux, JavaScript, HTML & CSS. Proven problem-solving skills and team performance. Dedicated to creating user-friendly web applications. Seeking opportunities to build products and enhance my programming skills.

PROJECTS

DOTCD PROJECT

Implemented a robust role-based login and dashboard system for the DOTCD project, optimizing operational efficiency for Operational Managers, Drivers, Field Supervisors, and General Managers.

Features:

- User Authentication and Role Verification
- Role-Based Redirection
- Operational Manager Dashboard
- Security and Logout
- Back-End - .NET Framework

Tech Stack: React, Redux, JavaScript and Material UI .

Responsibilities:

- Designed and developed a role-based login and dashboard system for the DOTCD project from scratch, enhancing operational efficiency for Operational Managers, Drivers, Field Supervisors, and General Managers.

Alsaif Project (https://alsaifweb.vercel.app/)

A solution for tracking shipments and managing customs and transport processes

Tech Stack:

- Front-End - Developed using Next.js, Tailwind CSS, Ant Design, i18next, react-leaflet, framer-motion, Context API, and Redux Toolkit with async thunk.
- Back-End : PHP Laravel
- Responsive and visually appealing design.

Responsibilities:

- Built responsive, high-performance UIs with Next.js, Tailwind CSS, and Ant Design.
- Managed complex app state using Redux Toolkit with async thunk and Context API.
- Collaborated with back-end team using PHP Laravel for seamless front-end/back-end integration.
- Collaborated using Git for version control and team alignment.
