## Personal Information

Title: Flutter Developer

## Hobbies and Interests

- Watching Movies

## Projects

**1. Feat Systems HRMS**

- **Overview: This project was aimed at building a Human Resources Management System (HRMS) for Feat Systems. It likely includes features to streamline HR processes like employee management, attendance tracking, leave management, and payroll handling.**
- **Role & Contributions:**
- **Developed the app using Flutter, focusing on delivering a responsive and user-friendly interface.**
- **Integrated backend services (possibly with APIs or a database) to fetch and display real-time data related to HR activities.**
- **Implemented functionalities such as employee profiles, attendance logs, and notifications to improve workflow efficiency.**
- **Ensured cross-platform compatibility, enabling the app to run on both Android and iOS devices.**

---

**2. Zomato Clone**

- **Overview: This project involved creating a clone of Zomato, a popular food delivery platform, as a practice or learning endeavor.**
- **Role & Contributions:**
- **Designed and implemented a UI that closely resembles the original Zomato app, focusing on smooth user navigation.**
- **Developed core functionalities such as restaurant listings, menu displays, search features, and cart management.**
- **Integrated dummy or real APIs to fetch restaurant and menu data.**
- **Used Flutter widgets to ensure a visually appealing and functional app.**
