## EDUCATION

**2015 - 2019**

**PUNE UNIVERSITY**

- Bachelor of Computer Science

## SKILLS

- Angular
- Angular Material
- Node.js
- Express.js
- Javascript
- Typescript
- HTML/CSS
- Bootstrap
- MongoDB
- MySQL
- Docker
- Jenkins
- Socket.IO
- Loopback4
- GIT
- Drupal 9/10

## PROFILE

IT professional with total 4+ years of experience in crafting enterprise and cloud applications. Proficient in Angular, Angular Material, Node.js, MongoDB, TypeScript (ES6), HTML5, Bootstrap, and Sass. Adept at creating interactive, user-friendly, and feature-rich interfaces. Committed to maintaining and delivering quality through best practices and clean code.

## WORK EXPERIENCE

**Universal Steel Information Technology** 2023 - PRESENT

Senior Software Engineer

- Engineered high-performance backend solutions using Node.js, successfully implementing WebSocket to gather and process real-time radar data with maximum efficiency.
- Optimized application stability and scalability by leveraging process managers like PM2 for seamless Node.js process management.
- Developed dynamic, high-performance web applications using Angular, integrating DevExtreme for efficient data handling and enhancing UI responsiveness.
- Implemented NgRx and RxJS for state management and reactive programming, ensuring seamless data flow. Designed and managed interactive yard visualizations using the Three.js editor, Angular Material, significantly improving real-time monitoring capabilities.
- Streamlined Oracle database operations using SQL Developer (sqldeveloper64w), ensuring data integrity, reliability, and optimized querying for high-efficiency data processing in mission-critical applications.

**Exela Technologies Pvt LTD** 2021 - 2023

Software Engineer

- Prototyped new UI/UX design, leading to improved performance and stability, up to 30% enhancement.
- Integrated SaaS version via Stripe, resulting in a 2x uplift in conversion rates for target audience and business.
- Conducted rigorous unit testing and debugging, while creating reusable components and adhering to best practices for clean, scalable code.
- Collaborated with a cross-functional agile team to develop, deploy, and troubleshoot 4+ web applications.
- Integrated third-party APIs such as WebEx, Drupal, Keycloak, and Stripe, enabling seamless functionality and enhancing system capabilities across the project.

**Sai Infotech** 2020- 2021

Software Developer

- Designed, developed, and maintained mobile and web applications using Angular, Ionic, and Cordova frameworks, enhancing performance, user experience, and cross-device compatibility.
- Designed responsive web pages with HTML5, CSS3, Sass, and Bootstrap.
- Led collaborative projects on GitHub, overseeing code reviews and conflict resolution.
