About Me

I am a passionate Flutter Developer with 3+ years of experience in building efficient, cross-platform mobile applications. With expertise in UI/UX design, state management, and API integration, I specialize in creating intuitive and engaging user experiences. Proficient in working within agile environments, I thrive in collaborative team settings to deliver high-quality, innovative solutions. I am driven to leverage my skills to develop impactful applications that make a meaningful difference.

Professional Experience

Anand Techverce

August 2024 - Present | Flutter Developer

Kamion Supply Chain Solutions Private Limited

March 2023 - July 2024 | Flutter Developer

Super Labs

Feb 2022 - Feb 2023 | Flutter Developer

Roles & Responsibilities :

- Developed cross-platform mobile applications using Flutter framework for iOS and Android.
- Collaborated with UI/UX designers to create visually appealing and intuitive interfaces.
- Implemented efficient state management solutions like Provider and GetX and Bloc.
- Integrated third-party APIs for authentication, data storage, and push notifications.
- Conducted rigorous testing to ensure high-quality, bug-free applications and optimized app performance and deployment processes.
- Stayed updated with latest Flutter developments and mentored junior developers.
