Projects

Document Management System (DMS)

Developed a web-based Document Management System using PHP and MySQL, designed to streamline organizational workflows by enabling secure document storage, retrieval, and management.

- Designed intuitive user interfaces with PHP, HTML, CSS, and JavaScript for seamless user interactions.
- Implemented MySQL for secure data storage and optimized database queries for faster document retrieval.
- Focused on scalability and security by following best practices for PHP and database integration.
  Technologies & Tools Used: PHP, MySQL, HTML, CSS, JavaScript

Frazen Technologies Pvt. Ltd. Website

Developed and maintained a WordPress-based website for Frazen Technologies, ensuring responsiveness and cross-device compatibility.

- Customized WordPress themes and plugins to meet client requirements.
- Enhanced site performance and SEO rankings through effective optimization techniques. Technologies & Tools Used: WordPress.

RB-Enterprises Website

Designed and launched a WordPress website for RB-Enterprises to enhance online presence and attract clientele.

- Configured server hosting and managed deployment for a seamless launch.
- Resolved cross-browser compatibility issues and optimized page load speeds. Technologies & Tools Used: WordPress.

TSCPCR Website

Deployed the official website for TSCPCR, hosted on Putty server.

- Ensured compliance with government hosting standards and optimized website security.
- Integrated necessary plugins and features for functionality while maintaining a user-friendly design.
  Technologies & Tools Used: WordPress, Putty Server Hosting

TrakAgile

Designed the UI/UX for TrakAgile, an employee and task management system.

- Created wireframes, prototypes, and designed intuitive user interfaces for tracking employee activities and tasks.
- Ensured the system was visually appealing and easy to use across multiple devices.
  Technologies & Tools Used: Figma, UI/UX Design
