Education

Alliance College — Bachelor Degree | *Jun 2018*

Technical Skills

Languages : Python, SQL, JavaScript,Typescript, HTML, XML, CSS
Frameworks : ReactJS, NodeJS, ExpressJS, Bootstrap
DevOps and API Tools : Git, Githhub, Rest Client
Databases : SQLite, MongoDB

Experience

Front-end developer | *Harsha Infra Projects Private Limited* *Apr 2023 – Mar 2024*

- Built and launched a React.js web application for both internal use and external clients, enhancing efficiency and user experience.
- Optimized application performance and responsiveness through React.js hooks and advanced component design.
- Created reusable components which can be used to overhaul the design for the product.
- Implemented Redux for state management and Axios for API integration.
- Create, Design and maintain company's web tool with React, Redux, React-Hooks, Express Js REST API, with MongoDB and SQLite database
- Very good understanding of JSON Web Tokens (JWT) with hands-on implementation for new applications.
- Hands-on experience in building, consuming, and integrating APIs, middleware,and web services.
- Implemented performance enhancing tasks for applications using React Hooks

Technical Support Engineer | *Conduent Business Services India LLP* *Aug 2021 – Feb 2022*

- Resolved 95% of support tickets on the first contact, minimizing downtime and boosting customer satisfaction by 25%. Provided technical assistance through strong communication skills, offering step-by-step solutions via phone, email, and live chat support.

Junior Front-end Developer | *Tech Mahindra* *Aug 2019 – Jul 2021*

- Assisted in developing web applications using JavaScript and React.js, improving the user interface and performance of internal tools.
- Fixed bugs and implemented new features based on user feedback and requirements, ensuring smooth functionality.
- Collaborated with senior developers to review code, optimizing it for better readability and maintainability.
- Participated in daily stand-ups, sprint planning, and code reviews to contribute to the agile development process.
- Created and used role based approach for web application using JWT.

Projects

Smarthub - Internal Support Tool for Streamlining Operations | *Dec 2019*

- Developed a comprehensive internal tool integrating Incident Management, Change Management, and Application Monitoring with Dynatrace and Emergency Call Out features. Led the frontend overhaul using React, Redux, and custom Hooks, optimizing workflows and improving user experience. Collaborated with backend teams to integrate Express JS, ensuring seamless data flow and operational efficiency..

Hardening Proposal and Tracking Tool | *Jun 2020*

- Developed a robust tool using React, Express.js, and MongoDB for tracking hardening proposals and obtaining client funding. The tool integrates multiple data tables, enables report downloads, and automates email communication with management to streamline approval processes. This project highlights my full-stack development skills and effective project management, ensuring efficient tracking of approvals and fund allocations.

NDA Tool | *Jan 2021*

- Developed a secure NDA signing tool integrated with LDAP, enabling seamless access for all organization members. The user-friendly application facilitated electronic NDA reviews and signatures, while managers could effortlessly send email reminders. Higher management accessed a comprehensive tracking table for NDA sign-offs, showcasing expertise in LDAP integration, user authentication, and data-rich interfaces using Python, React.
