WORK EXPERIENCE

Application Developer
IBM

09/2023 - Present *India*

Currently working on a project for USAA, developing and enhancing secure, web-based banking solutions for seamless user experiences.

Responsibilities

- Developed and maintained dynamic, user-friendly interfaces using **React** and **JavaScript** , ensuring a responsive design across various devices.
- Managed application state and optimized data flow using **Redux Toolkit** and **Redux Query** for efficient state management in complex applications.
- Implemented form handling and validation using **Formik** , improving user interaction and streamlining form submission processes.
- Wrote and executed unit tests using **Jest** to ensure code quality, identify bugs early, and maintain a high level of reliability in production code.
- Collaborated closely with backend teams to integrate APIs and handle data processing while ensuring the smooth functionality of frontend and backend communication.
- Delivered performance improvements and resolved UI issues, consistently providing innovative solutions to meet client requirements in the highly regulated banking sector.

EDUCATION

B.Tech (Computer Science and Engineering)
JSS Academy of Technical Education(A.K.T.U)
