## Professional Experience

**Senior Software Developer,** *Cero Smart Mobility Private Limited* 08/2023 – present
**Project:** Ev-Server

- Developed a corporate module enabling users linked to a corporation to charge without individual payments, with monthly billing covered by the company.
- Developed a robust web application for EV charging station management, featuring optimized schema design, RESTful APIs, and integrated wallet functionality for seamless payment processing.

**SDE-1,** *GeoSpoc (an OLA company)* 06/2022 – 08/2023
**Project:Ola Places-Api**

- Enhanced Ola Maps by developing features, RESTful APIs, schemas, and scripts, resolving bugs, and ensuring seamless integration and optimal performance, with unit tests for reliability.

**Ola Crud-Api** :In this project, I developed a system to locate charging stations for Ola vehicles. I utilized **Nest.js** for building the backend, **Elasticsearch** for efficient search functionality, and **PostgreSQL** for robust database management.

## INTERSHIP

**FunctionUp,** *, Backend Developer trainee* 01/2022 – 06/2022

- Trained in backend development using **Node.js** with **Express** and **MongoDB**.
- Trained in using **AWS S3** for scalable storage solutions and **AWS EC2** for flexible cloud computing

## SKILLS

**Programming:**
JavaScript , TypeScript , Python,

**Libraries and Framework:**
Node.js ,Express.js, Nest.js

**Version Control:**
Git and GitHub

**Database Management:**
Redis , MySQL , MongoDB

**Cloud Computing:**
AWS S3 , AWS EC 2

## Education

**B. Tech (CSE),** *Millennium Institute Of Technology And Science* 2018 – 2022
GPA-7.70

## Personal Projects

**Book Management**

- Developed backend for a Book Management website, implementing multiple APIs to handle CRUD operations.

**Products Management**

- Designed and developed RESTful APIs, ensuring efficient data processing, seamless integration.
