Experience/Projects

Systemic Altruism **Dec 2024 - Present**

Backend Developer

An Altruist Movement Focusing On Systemic Change To Maximize Impact.

- Designed, developed, and maintained RESTful APIs to enable seamless communication between frontend and backend systems.
- Built and maintained robust server-side logic to handle business rules, data processing, and integration with third-party APIs.
- Ensured reliability by debugging issues, implementing error handling mechanisms, and monitoring system performance.

Adivasi Yuva Seva Sangh **Aug 2024 – Oct 2024**

Web Developer

AYUSH is a dedicated networking platform aimed at tribal empowerment through knowledge and skill sharing. Focused on creating social responsibility awareness, it connects tribal youth and experts to provide educational and career guidance.

- Designed and implemented user-friendly interfaces focused on seamless navigation and improved user experience.
- Created visually appealing and functional web pages that align with brand identity and optimize user engagement.
- Applied SEO best practices, including on-page and technical SEO, to improve site rankings and visibility on search engines.
- Enhanced the website's architecture to support increased traffic and future feature expansions without compromising performance.

My Portfolio

Frontend Developer

- Languages and Technologies Used: JavaScript, HTML,CSS
- Developed a responsive and interactive web portfolio u to showcase personal projects, skills, and professional experience.
- Utilized modern web development practices, including component-based architecture and modular CSS, to create a maintainable and scalable codebase.
- Enhanced the visual appeal and functionality using custom animations and interactive elements, improving user engagement

Login/Logout Page

Backend Developer

- **Languages and Technologies Used**: Node.js, Express.js, MongoDB
- Developed a secure and responsive login/logout page using Node.js and Express.js, featuring key components for user authentication, session management, and database interaction.
- Designed functionality for secure login and logout processes, storing and managing user credentials in MongoDB, and dynamically updating session states.
- Integrated MongoDB to securely handle user data, using password hashing for added data security.
- Implemented error handling to provide clear feedback on login success or failure, and ensured smooth user experience even during server/database issues.

Myntra Clone

Frontend Developer

- **Languages and Technologies Used**: JavaScript, React, Bootstrap, CSS
- Created a fully functional clone of the Myntra website, replicating its core features and design.
- Utilized JavaScript, React, CSS, and Bootstrap to build a responsive and interactive user interface, ensuring a seamless user experience across devices.
- Structured the application using React components for modularity and reusability, enhancing maintainability and scalability

Education

Lovely Professional University (LPU) **2024 - Pursuing**

Master of Computer Applications *Phagwara, Punjab*
