Education

PSIT College of Higher Education — Aug 2019 – Jul 2022
Bachelor of Computer Application — *Kanpur, Uttar Pradesh*

Sardar Patel Inter College — Apr 2018 – May 2019
Intermediate — *Kanpur, Uttar Pradesh*

Experience (*January 2023 – Present*)

A full-stack web developer with 1 year of professional experience in building dynamic web **applications using React.js, Node.js, Django, and JavaScript**. Skilled in creating responsive user interfaces, integrating APIs, and implementing robust server-side logic. Adept at working collaboratively in a team environment and delivering high-quality code within project deadlines.

Projects

1) Employee Tracker: Technologies: React.js, JavaScript, Html/CSS, Material UI, Node.js, MySQL.

- Enables company owners to monitor employee details such as arrival time, working hours, departure time, and total hours.
- Provides a feature to download weekly employee progress and work summaries in Excel format.
- Ensured seamless API integrations and efficient data handling.

2) Lokkout: Technologies: Next.js, JavaScript, Python, Django, HTML/CSS, MySQL.

- A full-stack application for booking technicians for home and emergency lock services.
- **Built and integrated APIs to enable functionality like booking requests and technician assignments.**
- **Managed database schema and backend development using Django.**
- Designed and developed components and forms for the Next.js frontend.

3) Knobs: Technologies: React.js, Node.js, JavaScript, HTML/CSS, Express.js, Material UI.

- An e-commerce website for purchasing door and window knobs.
- **Includes an admin panel for managing product details and multiple store inventories.**
- Integrated APIs to fetch and display data dynamically on the front end.

4) Lottery : Technologies: React.js, Node.js, HTML/CSS, MySQL.

- full-stack web application for purchasing tickets and participating in a lottery.
- **Includes features like online payment integration, real-time updates using Socket.IO, and multi-language support.**
- **Designed and developed the database schema.**
- **Created and integrated APIs to support the application's functionality.**

Technical Skills

Languages: C, C++, JavaScript, Python and HTML/CSS.
Developer Tools: VS Code, GitHub, Postman, Swagger API.
Database: PostgreSQL, MySQL.
Technologies/Frameworks: React.js, Next.js, Node.js, Django, Bootstrap and Material UI.

Certifications

- **Certified** - Architecting with Google Cloud Compute Engine.

Achievement/Awards

- Earned a **Silver Badge** in Python programming on HackerRank.
- Actively engaged in solving problems on **LeetCode**, enhancing problem-solving skills.
