EXPERIENCE

JSTECHNO Solutions Pvt.Ltd,Ahmedabad India

April-2024 To Oct-2024

- Proficient in Vue.js and React.js for developing responsive, interactive user interfaces.
- Solid understanding of component- based architecture and state management in both frameworks.
- Developed and maintained frontend components using Vue.js for an ERP software project.
- Implemented state management with Vue 3 (for Vue.js) to manage application states efficiently.
- Integrated RESTful APIs to fetch and update data within the ERP system. Optimized application performance by implementing virtual DOM and memoization techniques in both Vue.js.
- Ensured cross-browser compatibility and responsive design principles were adhered to during development.

Amisys Software, Ahmedabad India

Oct-2023 To April-2024

- Worked on developing an Order Management System application with both admin and user modules.
- Utilized JSON for efficient data interchange between frontend and backend components.
- Developed Android apps in Java, emphasizing user interface and experience.
- Utilized Android Studio for efficient development and debugging.
- Created backend APIs using PHP for seamless data interaction.
- Managed MySQL databases for efficient data storage and retrieval.
  Supported backend infrastructure on Linux servers..
- Conducted debugging and troubleshooting for optimal
- performance.
- Contributed to code reviews and process enhancements.
- Documented technical specifications and project progress.
- Stayed updated with industry trends for skill enhancement.

Company Project

JSTECHNO Solutions Pvt.Ltd

Project : FilsilPek **https://erp.filsilpek.com/login.php**
Project : Finment **https://www.crm.finmentcapital.co.in/dashboards/crm**

- Developed frontend modules and interfaces using Vue 3 for an ERP software application, ensuring optimal performance and maintainability.
- Implemented the Pinia state management pattern to centralize and manage application state across different components, enhancing code organization and reactivity.
- Utilized Vue 3 Composition API to streamline logic and improve code readability within frontend components.
- Collaborated with backend developers to integrate frontend components with RESTful APIs, ensuring seamless data flow and synchronization.
- Optimized application performance by leveraging Vue 3's virtual DOM and reactive data binding capabilities.

Amisys Software

- Client Side - Order Managnment System
- User Side - MyOrder

I have worked on live projects and dummy projects during my internship

Using Applications For My Project during My Internship
- Android Studio - MySql Workbench - Visual Studio
- FileZilla - Postman

My Project
