Portfolio

https://www.varu-atmosphere.com/ *Wordpress*

- I implemented the design provided by the design team using HTML CSS, Javascript and jquery, ensuring pixel-perfect accuracy and consistency with the mockups.

https://form-hotel.com/ *Wordpress*

- I implemented the design provided by the design team using HTML CSS, Javascript and jquery, ensuring pixel-perfect accuracy and consistency with the mockups.

Ecommerce App *Next Js*

- I created an online store where people can buy different things. As a Frontend Developer, I focused on making the store easy for Guest users to use. Guests can look at all the products, search for specific ones, and add them to their shopping cart. I also made a Cart Page where users can see what they've added to their cart, how many of each item they have, how much each item costs, and the total amount they'll pay.

Form Build App *Next Js*

- As a frontend developer using Next.js, I created a form builder application that allows users to dynamically add, edit, and list form fields with validation.
