Projects

BOOKMYPLOTS (Real estate agent promotions**)**
Company: Streamflo Business Solutions LLP
Duration: 1 Year
Technologies: Solid JS, Astro JS, Serverless API, AWS
Platform: Web, App
Description: BookMyPlots is a real estate platform aimed at enhancing the property buying and selling experience. As a Full Stack Developer, I was responsible for designing and maintaining the server-side logic and database architecture, ensuring seamless integration with front-end applications.

Key Responsibilities:

- Developed scalable server-side applications with Node.js.
- Implemented secure authentication (JWT) and authorization mechanisms.
- Designed RESTful APIs for seamless front-end and back-end communication.
- Fixed production issues to ensure optimal system performance.

Personal Projects

Cloned Company Website & Web App

- Replicated the core functionality and design of Equest Solutions' website and web application.
- Focused on UI/UX enhancements to deliver a seamless user experience similar to the original application.

Instagram Background Music Website

- Created a website for downloading and playing Instagram background music.
- Added a feature to include static data for improved user interaction.

Experience

Full Stack Developer Jul 2023- Present
Streamflo Business Solutions LLP Virudhachalam, Tamil Nadu

- Designed and implemented server-side logic for web applications.
- Collaborated with a team of 4 to develop scalable real estate platforms.
- Resolved critical production issues to ensure seamless functionality.

Education

Bachelor of Computer Applications (BCA) 2019-2022
Joseph Arts and Sciences College, Thirunavalur.
