Professional Summary

Frontend Developer with 2+ years of experience and expertise in React.js. Good at building easy-to-use web applications and optimizing their performance. Skilled in designing and developing responsive websites that work seamlessly across devices, integrating APIs, and enhancing user interactions. Excellent at collaborating with teams and engaging with clients to deliver high-quality results.

Professional Experience

Frontend Developer

May 2022 - Present

RTS Manpower Solution Pvt Ltd

- Designed, developed, and tested responsive web applications for both mobile and desktop, ensuring a smooth and consistent user experience.
- Resolved code errors while integrating RESTful APIs in Django, displaying dynamic data on the frontend to enhance the user experience for the analytical team.
- Developed and designed the UI for a client portal database and created a secure login for over 100 members.
- Designed and implemented a web application, acting as the main contact for the web team to integrate 3rd-party software and address inter-departmental and client-facing issues.

Professional Projects

Open Source Intelligence (OSINT)

- Developed a web application to search news, images, videos, and data from databases and third-party APIs, displaying real-time data in tables and cards with easy-to-use search filters for fast, accurate results.
- Developed UI for single and bulk keyword searches, presenting results in tables with charts and options to download as PDFs/Excel.
- Implemented functionality for direct keyword input and CSV file uploads, displaying results with error handling to ensure smooth data presentation for users.

Tourism

- Developed a web app to survey the preferences of Indian and international tourists, managing their data with authentication middleware and organizing it by country, state, and district.
- Used survey data to create personalized recommendations for tourists.
- Designed client dashboard to track keyword search activity and visualize trends over time.

Certifications

React - The Complete Guide 2024 (incl. React Router & Redux)
Udemy (Academind by Maxmilian)
