SUMMARY

I am a QA Test Engineer with over three years of experience at Shyam Steel Manufacturing Limited. My expertise includes manual testing, SQL, Node.js, Flutter, Android development, Dart, Java, and MongoDB. I've contributed to e-commerce, social media, and sales tracking applications, using Flutter for the front end and Node.js and MongoDB for the backend. I'm committed to delivering high-quality software through meticulous testing and collaboration with development teams.

EXPERIENCE

QA Test Engineer

Shaym Steel Manufacturing Limited

08/2021 - Present Kolkata, India

- Conducted comprehensive testing of software applications, identifying and reporting defects to ensure product quality and functionality.
- Collaborated with cross-functional teams to develop and execute test plans, strategies, and test cases for both manual and automated testing processes.
- Implemented and maintained test automation frameworks using tools such as Selenium and JUnit to streamline testing efforts and improve efficiency.
- Participated in regular code reviews and provided feedback to developers to ensure adherence to quality standards and best practices in software development.

PROJECTS

E-Commerce App

Developed and tested a robust e-commerce application using Flutter for the front end and Node.js with MongoDB for the backend, ensuring scalability and performance.

Social Media App

Created a social media platform with Flutter for the front end and implemented backend functionalities using Node.js and MongoDB, facilitating seamless real time user interaction and content sharing.

CRM App

Designed and implemented an app for salespersons using Flutter for the frontend and Node.js with MongoDB for the backend, enabling efficient management of day-to-day data, sales, attendance, loyalty programs, feedback, maps, and data submission.

URL Shortener Module

Developed a webpage where any URL can be shortened using Node JS & MongoDB
