

SUMMARY/OBJECTIVE

Motivated and detail-oriented React Developer with 1+ year of experience in building dynamic, user-centric web applications. Expertise in developing responsive UIs using React.js, HTML, CSS, and Bootstrap, with a focus on enhancing user experience and ensuring seamless functionality. Experienced in building and optimizing UIs for VoIP platforms, Job portals, and E-commerce websites. Eager to leverage my skills and contribute to exciting new web development challenges.

SKILLS

- **Frontend Development:**
 - React.js, JavaScript (ES6+), HTML, CSS
 - UI Libraries: Bootstrap, Material UI, Tailwind CSS
 - Responsive & Mobile-first Design
 - React Hooks, Context API, React Router
 - **Databases**
 - MongoDB (CRUD operations, Mongoose basics)
 - MySQL (queries, schema design basics)
 - Adaptable in working from home environment
- **Backend & APIs**
 - REST API integration (Axios)
 - JSON data handling
 - **Version Control & Tools**
 - Git, GitHub
 - VS Code, Postman, Chrome DevTools
 - **Other Skills**
 - WordPress (basic theme customization)
 - Cross-browser Compatibility
 - Problem Solving & Debugging
 - Strong communication & teamwork

WORK EXPERIENCE

Jr. React Developer

Bytebran Technology | Ahmedabad | April- 2024 - May-2025

- **Krindex (E-commerce):** Contributed to product catalog, cart, and checkout features. Integrated REST APIs for product listings, order placement, and user authentication. Developed admin dashboards for inventory management and added filters & sorting options for buyers. Focused on responsive UI design for better accessibility across devices.
- **Call Center (VoIP-based Project):** Designed interactive dashboards and call handling screens using React.js. Integrated WebSocket for real-time call events and notifications. Created reusable UI components and maintained state management using Context API.
- **Job Karan (Job Portal Platform):** Developed a dual-login system (Job Seeker/Recruiter) with React Router. Built forms for registration, login, and job posting using controlled components and validation. Integrated MongoDB for storing user profiles, job listings, and recruiter details. Ensured secure API communication for authentication and data flow.

- **Meetoria (VoIP Platform):** Enhanced UI components and implemented theme customization. Worked with REST APIs to fetch call logs and active sessions. Optimized frontend performance for faster rendering and seamless UX.
- Collaborated with backend developers and QA team to identify and fix bugs, participated in sprint planning, and contributed to code reviews.

Jr. Web Developer

KARMA TECHNOLABS | Ahmedabad | September 2022 - January 2024

- Developed and maintained company website karmatechnolabs.com
- Reach The Globe (CMS): Built a responsive visa consultancy website with custom content management features.
- The Hindu (Admin Panel): Worked on admin panel modules for managing articles and categories.
- Assisted team members in debugging, cross-browser testing, and deployment support.

EDUCATION

- **M.C.A**
Maharaja Krishnakumar Bhavnagar University, Gujarat (2021) | First Class
- **B.C.A**
Shree Swaminarayan College of Computer Science, Bhavnagar (2018) | First Class

ACTIVITIES & PARTICIPATION

- Participated in State-level C/C++ Programming competitions.
- Active participant in various tech quizzes and coding events.
- Engaged in extracurricular activities including cricket tournaments.

DECLARATION

- I hereby confirm that the details mentioned in this resume are accurate and true to the best of my knowledge.
