Other Skills: Teamwork, Problem-Solving, Communication, Punctuality
Tools: Git, GitHub, VS Code
AI Tools: OpenAI API (DALL·E), ChatGPT, Claude AI

Work Experience

KGN Technology Pvt. Ltd. (Ahmedabad)

Nov 2022 – Present

PHP Developer

- Worked as the main Shopify developer in the company, handling projects independently.
- Worked on multiple WordPress and Shopify websites, handling development and maintenance tasks.
- Built custom Shopify app functionality using Admin API to store user data as metaobject entries and display it on the frontend.
- Developed a custom form module using PHP cURL and Shopify for storing and managing user submissions.
- Integrated WordPress and Shopify using REST API to fetch stockist data from WordPress and display it in Shopify.
- Implemented a store locator using Google Maps API, allowing users to search nearby stores by city or pincode.
- Developed Checkout UI extensions to collect additional customer information during checkout and store it in order data.
- Gained basic experience in Laravel by working on MVC-based modules.
- Collaborated with the QA team to test and ensure quality delivery.

Flora Fountain (Ahmedabad)
Backend Developer

Feb 2021 – Nov 2022

- Worked on Shopify and PHP-based backend development.
- Assisted in developing internal projects like HRM system.
- Worked closely with team members and manager to complete tasks on time.
- Performed testing and debugging for multiple projects.

Career Highlights

Flora Fountain

- Improved skills in basic design tasks like creating GIFs and cropping banners using PSD.

KGN Technology Pvt. Ltd.

- Maintained multiple WordPress CMS and Shopify sites as a Backend Developer.
- Enhanced my debugging skills through hands-on practice and continuous learning.
- Handled Shopify development as the **primary developer** in the company.

React/MERN Stack Portfolio

Spotify Clone

- Developed a basic music website using **React** and **Spotify API** to fetch real-time song data.
- Implemented a dynamic search feature to display results based on user input.

AI Image Generation App

- Developed a full-stack web application using **MERN stack** to generate images based on user-provided prompts.
- Used **OpenAI's DALL·E API** to generate images from text descriptions.
- Designed a user-friendly interface for easy input and viewing of images.
