SUMMARY

Junior PHP Developer with hands-on experience in PHP, MySQL, and e-commerce application development. Skilled in backend development, REST APIs, Git, and database management. Seeking a PHP/Laravel Developer role to build scalable web applications.

EDUCATION

Bachelor of Engineering: Information Technology (CGPA: 7.51) 2023 - 2026
Shantilal Shah Engineering College, Bhavnagar

Diploma in Engineering: Information Technology (CGPA: 8.29) 2020 - 2023
Sir Bhavsinhji Polytechnic Institute, Bhavnagar

PROFESSIONAL EXPERIENCE

Junior PHP Developer - MobileSentry India February 2026 - Present

- Developed and maintained e-commerce applications using PHP, Magento, and MySQL.
- Customized Magento modules, themes, and implemented new features based on business requirements.
- Resolved bugs, optimized application performance, and ensured smooth website functionality.
- Collaborated with the development team using Git for version control and code management.

Web Development Intern - InternPe April 2025 - May 2025

- Designed and built responsive web pages using HTML, CSS, and JavaScript.
- Gained hands-on experience in developing user interfaces and improving website interactivity.
- Gained practical knowledge of frontend development tools and workflows.

PROJECTS

E-Gram Panchayat Services – Web Application — [GitHub](#)

- Developed a full-stack complaint management system using PHP, JavaScript, and MySQL.
- Designed secure user authentication and an admin dashboard for issue resolution.
- Deployed on local server for testing, demonstrating CRUD operations and data flow.

On-Demand Home Services Platform — [GitHub](#)

- Developed a MERN-based home services booking platform with user and admin panels.
- Implemented JWT authentication, service booking, and Razorpay payment integration.
- Designed REST APIs and managed MongoDB database operations during internship training.

PresenTrack – Online Student Attendance Management System — [GitHub](#)

- Built an Android-based attendance management app using Java and MySQL.
- Integrated REST API endpoints for real-time attendance sync between teachers and admin.
- Implemented role-based access and optimized database queries to improve performance.
